A Colourful Brick Story:

Kim Kang Yong.

Delve into the wonderfully colourful world of Kim Kang Yong.

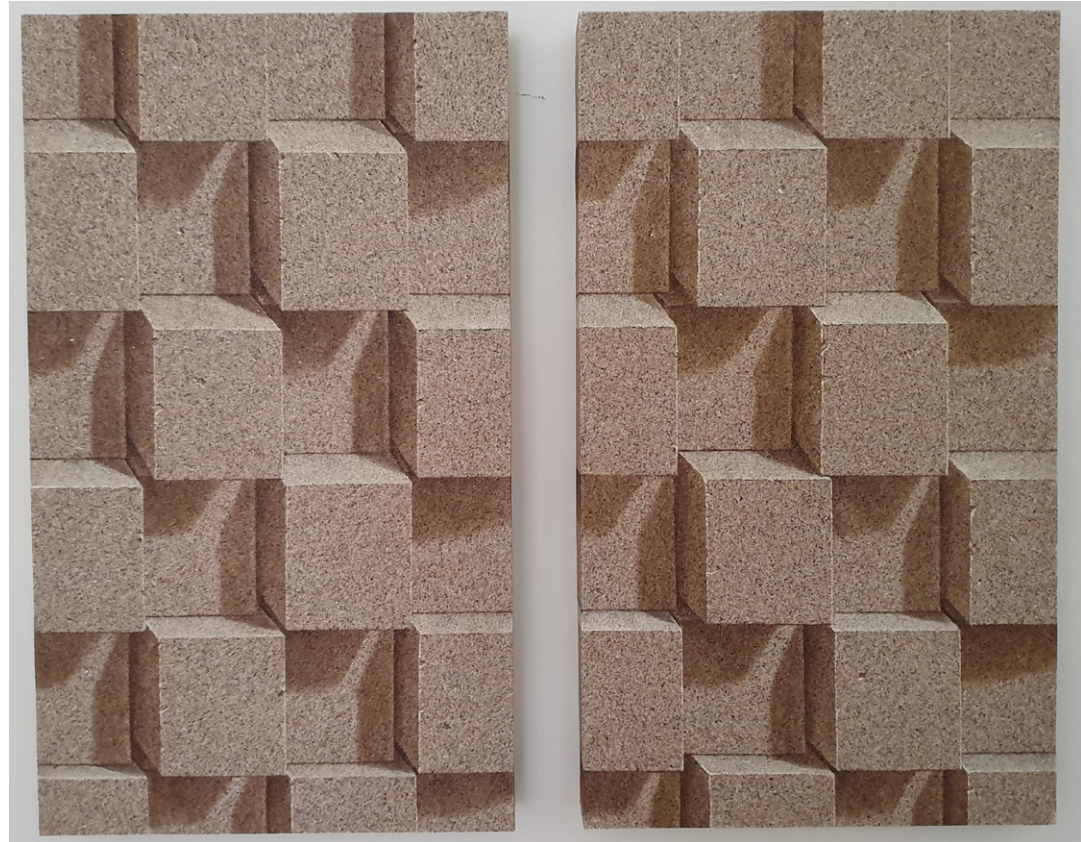

This exhibition features his wonderfully created pieces of mixed media artworks, which feature a multitude of bricks, in a variety of settings and placements. Even though these are 2-D pieces, all are brimming with 3-dimensional hyper realistic depictions of these bricks, with bright, bold colours, along with some conventional red-brown coloured bricks.

Kim Kang Yong's use of these bricks he has created allow the viewer to stare and get lost in this unique technique and application of style, form and colour. These pieces draw you in and evokes a contemplative feeling with its use of patterns and geometric positioning. These pieces by Kim blur the boundary between what is real and what is not. Kim creates the illusion that these bricks, which are the foundation of many buildings around the world are really there, by capturing the subtle details such as how the light hits and the shadows fall.

These unique pieces express a feeling of freedom using bright building blocks for life, art and beyond.

What colour would your Brick Story be?
